GLUCOSE FASTING (I by glucose oxidas GLUCOSE POST PRAI	GLUCOS F): PLASMA SE - PEROXIDASE (GOD-POD)	ICAL CHEMISTRY	BIOCHEMISTR	(PP) NORMAL: < 100.0 PREDIABETIC: 100.0 - 125.0

## IN ACCORDANCE WITH AMERICAN DIABETES ASSOCIATION GUIDELINES:

**KOS Diagnostic Lab** 

(A Unit of KOS Healthcare)

 A fasting plasma glucose below 100 mg/dL and post-prandial plasma glucose level below 140 mg/dl is considered normal.
 A fasting plasma glucose level between 100 - 125 mg/dl and post-prandial plasma glucose level between 140 - 200 mg/dL is considered as glucose intolerant or pre diabetic. A fasting and post-prandial blood test (after consumption of 75 gms of glucose) is recommended for all such patients

3. A fasting plasma glucose level of above 125 mg/dL and post-prandial plasma glucose level above 200 mg/dL is highly suggestive of diabetic state. A repeat post-prandial is strongly recommended for all such patients. A fasting plasma glucose level in excess of 125 mg/dl on both occasions is confirmatory for diabetic state.
