IMMUNOPATHOLOGY/SEROLOGY

ANTI STREPTOLYSINS O (ASO) QUANTITATIVE

ANTI STREPTOLYSIN O (ASO) QUANTITATIVE by NEPHLOMETRY	404.92 ^H	IU/ml	0 - 250
--	---------------------	-------	---------

INTERPRETATION:-

A number of bacterial antigens have been identified in cultures of group A streptococci. These extracellular products are primarily enzymatic proteins and include streptolysin O. Infections by the group A streptococci are unique because they can be followed by the serious nonpurulent complications of rheumatic fever and glomerulonephritis. Increased ASO titer is indicative of acute or recent streptococcal infection.

NOTE: False-high titers may be obtained in patients with liver disease where the presence of high lipoprotein concentrations in the serum may mimic antibody activity.
