

KOS Diagnostic Lab

(A Unit of KOS Healthcare)

Dr. Vinay Chopra MD (Pathology & Microbiology) Chairman & Consultant Pathologist

Dr. Yugam Chopra MD (Pathology) CEO & Consultant Pathologist

NAME : Mrs. POOJA

AGE/ GENDER : 24 YRS/FEMALE **PATIENT ID** : 1774521

COLLECTED BY REG. NO./LAB NO. :012503010040

REFERRED BY : CIVIL HOSPITAL (AMBALA CANTT) **REGISTRATION DATE** : 01/Mar/2025 12:57 PM BARCODE NO. :01526299 **COLLECTION DATE** : 01/Mar/2025 12:59PM CLIENT CODE. : KOS DIAGNOSTIC LAB REPORTING DATE : 01/Mar/2025 03:05PM

CLIENT ADDRESS : 6349/1, NICHOLSON ROAD, AMBALA CANTT

Value Unit **Biological Reference interval Test Name**

IMMUNOPATHOLOGY/SEROLOGY ANTI THYROID PEROXIDASE (TPO/AMA) ANTIBODIES

ANTI TPO/AMA ANTIBODIES: SERUM

IU/mL 0.00 - 10.0

DIABETES (II): < 25.0

by CLIA (CHEMILUMINESCENCE IMMUNOASSAY)

INTERPRETATION: 1. Thyroperoxidase (TPO) is an enzyme involved inthyroid hormone synthesis, catalyzing the oxidation of iodide on tyrosine residues in thyroglobulin for the synthesis of triiodothyronine and thyroxine (tetraiodothyronine).

2. TPO is a membrane-associated hemo glycoprotein expressed only in thyrocytes and is one of the most important thyroid gland antigens.

3. Anti-TPO is technically superior and a more specific method for measuring thyroid auto-antibodies, It is especially useful in patients presenting with subclinical hypothyroidism where TSH is elevated but Free T4 levels are normal.

INCREASED LEVELS (Autoimmune thyroid disease):

- 1. Hashimoto thyroiditis.
- Idiopathic myxedema.
- Graves disease
- 4. Post-partum thyroiditis.
- 5. Primary hypothyroidism due to Hashimoto thyroiditis.

NOTE:

- 1. The highest TPO antibody levels are observed in patients suffering from Hashimoto thyroiditis. In this disease, the prevalence of TPO antibodies is about 90% of cases, confirming the autoimmune origin of the disease.

 2. These auto-antibodies also frequently occur (60%-80%) in the course of Graves disease.
- 3. In patients with subclinical hypothyroidism, the presence of TPO antibodies is associated with an increased risk of developing overt hypothyroidism.
