| Test Name | | Value | Unit | Biological Reference interval | |
| CLINICAL CHEMISTRY/BIOCHEMISTRY GLUCOSE FASTING (F) | | | | | |
| GLUCOSE FASTING (F by glucose oxidasi |): PLASMA = - PEROXIDASE (GOD-POD) | 111.38 ^H | mg/dL | NORMAL: < 100.0 PREDIABETIC: 100.0 - 125.0 DIABETIC: > 0R = 126.0 | |
| A fasting plasma glucose level below 100 mg/dl is considered normal. A fasting plasma glucose level between 100 - 125 mg/dl is considered as glucose intolerant or prediabetic. A fasting and post-prandial blood test (after consumption of 75 gms of glucose) is recommended for all such patients. A fasting plasma glucose level of above 125 mg/dl is highly suggestive of diabetic state. A repeat post-prandial is strongly recommended for all such patients. A fasting plasma glucose level in excess of 125 mg/dl on both occasions is confirmatory for diabetic state. | | | | | |
