AGE/ GENDER	: 35 YRS/MALE	РАТ	IENT ID	: 1369976
COLLECTED BY	:	REG	. NO./LAB NO.	: 122409260013
REFERRED BY	:	REG	ISTRATION DATE	: 26/Sep/2024 01:54 PM
BARCODE NO.	: 12504943	COL	LECTION DATE	: 26/Sep/2024 02:35PM
CLIENT CODE.	: P.K.R JAIN HEALTHCARE INSTITU	JTE REP	ORTING DATE	: 26/Sep/2024 02:35PM
CLIENT ADDRESS	: NASIRPUR, HISSAR ROAD, AMBAI	LA CITY - HARYAN	NA	
Test Name		Value	Unit	Biological Reference interval
		НАЕМАТС	DLOGY	
		HAEMOGLO	BIN (HB)	
HAEMOGLOBIN (HB)		11.8 ^L	gm/dL	12.0 - 17.0
by CALORIMETRIC				
•				
INTERPRETATION:-	otein molecule in red blood cells that	carries oxygen fr	om the lungs to the bo	odys tissues and returns carbon dioxide from
INTERPRETATION:- Hemoglobin is the protection of the protection of the second s	ngs.		om the lungs to the bo	odys tissues and returns carbon dioxide from
INTERPRETATION:- Hemoglobin is the protissues back to the lu A low hemoglobin lev	ngs. /el is referred to as ANEMIA or low rec		om the lungs to the bo	odys tissues and returns carbon dioxide from
INTERPRETATION:- Hemoglobin is the pritissues back to the lu A low hemoglobin lev ANEMIA (DECRESED I 1) Loss of blood (trau	ngs. el is referred to as ANEMIA or low rec H AEMOGLOBIN): Imatic injury, surgery, bleeding, color	d blood count.		odys tissues and returns carbon dioxide from
INTERPRETATION:- Hemoglobin is the pri- tissues back to the lu A low hemoglobin lev ANEMIA (DECRESED I 1) Loss of blood (trau 2) Nutritional deficie	ngs. rel is referred to as ANEMIA or low rec H AEMOGLOBIN): Imatic injury, surgery, bleeding, color ncy (iron, vitamin B12, folate)	d blood count. n cancer or stoma		odys tissues and returns carbon dioxide from
INTERPRETATION:- Hemoglobin is the pritissues back to the lu A low hemoglobin lev ANEMIA (DECRESED I 1) Loss of blood (trau 2) Nutritional deficie 3) Bone marrow prob	ngs. vel is referred to as ANEMIA or low rec H AEMOGLOBIN): Imatic injury, surgery, bleeding, color ncy (iron, vitamin B12, folate) Iems (replacement of bone marrow b	d blood count. n cancer or stoma v cancer)		odys tissues and returns carbon dioxide from
INTERPRETATION:- Hemoglobin is the pritissues back to the lu A low hemoglobin lev ANEMIA (DECRESED I 1) Loss of blood (trau 2) Nutritional deficie 3) Bone marrow prob 4) Suppression by rec 5) Kidney failure	ngs. vel is referred to as ANEMIA or low red H AEMOGLOBIN): Imatic injury, surgery, bleeding, color ncy (iron, vitamin B12, folate) Iems (replacement of bone marrow b d blood cell synthesis by chemotherap	d blood count. n cancer or stoma y cancer) py drugs		odys tissues and returns carbon dioxide from
INTERPRETATION:- Hemoglobin is the pritissues back to the lu A low hemoglobin lev ANEMIA (DECRESED I 1) Loss of blood (trau 2) Nutritional deficie 3) Bone marrow prob 4) Suppression by rec 5) Kidney failure 6) Abnormal hemoglo	ngs. vel is referred to as ANEMIA or low red HAEMOGLOBIN): Imatic injury, surgery, bleeding, color ncy (iron, vitamin B12, folate) Iems (replacement of bone marrow b d blood cell synthesis by chemotherap obin structure (sickle cell anemia or t	d blood count. n cancer or stoma y cancer) py drugs		odys tissues and returns carbon dioxide from
INTERPRETATION:- Hemoglobin is the pro- tissues back to the lu A low hemoglobin lev ANEMIA (DECRESED I 1) Loss of blood (trau 2) Nutritional deficie 3) Bone marrow prob 4) Suppression by reo 5) Kidney failure 6) Abnormal hemoglu POLYCYTHEMIA (INCR 1) People in higher a	ngs. vel is referred to as ANEMIA or low red HAEMOGLOBIN): Imatic injury, surgery, bleeding, color ncy (iron, vitamin B12, folate) Ilems (replacement of bone marrow b d blood cell synthesis by chemotherap bbin structure (sickle cell anemia or t REASED HAEMOGLOBIN): Ititudes (Physiological)	d blood count. n cancer or stoma y cancer) py drugs		odys tissues and returns carbon dioxide from
INTERPRETATION:- Hemoglobin is the pri- tissues back to the lu A low hemoglobin lev ANEMIA (DECRESED I 1) Loss of blood (trau 2) Nutritional deficie 3) Bone marrow prob 4) Suppression by red 5) Kidney failure 6) Abnormal hemogle POLYCYTHEMIA (INCR 1) People in higher a 2) Smoking (Secondal	ngs. vel is referred to as ANEMIA or low red HAEMOGLOBIN): Imatic injury, surgery, bleeding, color ncy (iron, vitamin B12, folate) Ilems (replacement of bone marrow b d blood cell synthesis by chemotherap obin structure (sickle cell anemia or t EASED HAEMOGLOBIN): Ititudes (Physiological) ry Polycythemia)	d blood count. n cancer or stoma y cancer) py drugs chalassemia).	ch ulcer)	odys tissues and returns carbon dioxide from
INTERPRETATION:- Hemoglobin is the pri- tissues back to the lu A low hemoglobin lev ANEMIA (DECRESED I 1) Loss of blood (trau 2) Nutritional deficie 3) Bone marrow prob 4) Suppression by rec 5) Kidney failure 6) Abnormal hemogle POLYCYTHEMIA (INCE 7) People in higher a 2) Smoking (Secondau 3) Dehydration produ	ngs. vel is referred to as ANEMIA or low red HAEMOGLOBIN): Imatic injury, surgery, bleeding, color ncy (iron, vitamin B12, folate) Iems (replacement of bone marrow b d blood cell synthesis by chemotherap obin structure (sickle cell anemia or t EASED HAEMOGLOBIN): Ititudes (Physiological) ry Polycythemia) uces a falsely rise in hemoglobin due	d blood count. n cancer or stoma y cancer) py drugs chalassemia).	ch ulcer)	odys tissues and returns carbon dioxide from
INTERPRETATION:- Hemoglobin is the pri- tissues back to the lu A low hemoglobin lev ANEMIA (DECRESED I 1) Loss of blood (trau 2) Nutritional deficien 3) Bone marrow prob 4) Suppression by rec 5) Kidney failure 6) Abnormal hemoglo POLYCYTHEMIA (INCF 1) People in higher a 2) Smoking (Secondan 3) Dehydration produ 4) Advanced lung dise 5) Certain tumors	ngs. vel is referred to as ANEMIA or low red HAEMOGLOBIN): umatic injury, surgery, bleeding, color ncy (iron, vitamin B12, folate) lems (replacement of bone marrow b d blood cell synthesis by chemotherap obin structure (sickle cell anemia or t REASED HAEMOGLOBIN): Ititudes (Physiological) ry Polycythemia) uces a falsely rise in hemoglobin due re ease (for example, emphysema)	d blood count. In cancer or stoma y cancer) py drugs chalassemia). to increased haen	ch ulcer)	odys tissues and returns carbon dioxide from
INTERPRETATION:- Hemoglobin is the pri- tissues back to the lu A low hemoglobin lev ANEMIA (DECRESED I 1) Loss of blood (trau 2) Nutritional deficien 3) Bone marrow prob 4) Suppression by red 5) Kidney failure 6) Abnormal hemoglo POLYCYTHEMIA (INCF 1) People in higher a 2) Smoking (Secondan 3) Dehydration produ 4) Advanced lung dise 5) Certain tumors 6) A disorder of the b	ngs. vel is referred to as ANEMIA or low red HAEMOGLOBIN): Imatic injury, surgery, bleeding, color ncy (iron, vitamin B12, folate) lems (replacement of bone marrow b d blood cell synthesis by chemotheral bbin structure (sickle cell anemia or t REASED HAEMOGLOBIN): Ititudes (Physiological) ry Polycythemia) uces a falsely rise in hemoglobin due ease (for example, emphysema) one marrow known as polycythemia	d blood count. In cancer or stoma y cancer) py drugs halassemia). to increased haen rubra vera,	ch ulcer)	odys tissues and returns carbon dioxide from

NOTE: TEST CONDUCTED ON EDTA WHOLE BLOOD
