|   | CLIN   | ICAL CHEMIS         | TRY/BIOCHEMIST               | 'RY  |  |  |
|   |  | GLUCOSE             | RANDOM (R)                   |  |  |  |
| GLUCOSE RANDOM (R): PLASMA 222.0<br>by glucose oxidase - peroxidase (God-Pod) |  | 222.07 <sup>H</sup> | mg/dL                        | NORMAL: < 140.00<br>PREDIABETIC: 140.0 - 200.0<br>DIABETIC: > 0R = 200.0 |  |  |
| INTERPRETATION  |  |                     |                              |  |  |  |
|   | H AMERICAN DIABETES ASSOCIA<br>alucose level below 140 ma/dl |                     |                              |  |  |  |
| 2. A random glucose   | level between 140 - 200 mg/dl                                | is considered as g  | lucose intolerant or prediat | petic. A fasting and post-prnadial blood test                            |  |  |

(after consumption of 75 gms of glucose) is recommended for all such patients.
3. A random glucose level of above 200 mg/dl is highly suggestive of diabetic state. A repeat post-prandial is strongly recommended for all such patients. A fasting plasma glucose level in excess of 125 mg/dl on both occasions is confirmatory for diabetic state.
