				rg	<u> </u>				
Down's Syndrome Risk The calculated risk for Trisomy 21 is below the cut off which represents a low risk. After the result of the Trisomy 21 test it is expected that among 7375 women with the same data, there is one woman with a trisomy 21 pregnancy and 7374 women with not affected pregnancies. The calculated risk by PRISCA depends on the accuracy of the information provided by the referring physician. Please note that risk calculations are statistical approaches and have no diagnostic value!									
Neural tube defects risk					Risk for trisomy	18			
	rected Mo a for neura			cated in the low	The calculated ris indicates a low ris		18 is < 1:10000, which		

below cut off	Below Cut Off, but above Age Risk	above cut off	Prisca 5.2.0.13
