(A Unit of KOS Healthcare)

Dr. Vinay Chopra MD (Pathology & Microbiology) Chairman & Consultant Pathologist

Dr. Yugam Chopra MD (Pathology) **CEO & Consultant Pathologist**

NAME: Mr. PARVEEN KUMAR Age/Gender: 25 Y/Male

Accession No.: Specimen ID: 012412030015 Specimen: Collected: Registered:

113115 BC2401161 Whole Blood HEPARIN 03/Dec/2024 11:39AM 03/Dec/2024 11:39AM

18/Dec/2024 04:51PM

Referred BY: Self Remark:

CYTOGENETICS REPORT

Reported:

Test Name:Karyotype - Blood

Lab NO:

Method: G-banding Metaphases counted: 20 20 Metaphases analyzed: Metaphases karyotyped: 14 Banding Resolution: 400 Karyotype (ISCN 2016): 46,XY

INTERPRETATION:

Normal male chromosome complement. There is no evidence of aneuploidy or structural rearrangement at the resolution of banding analysis.

Mr. Brijesh **Authorised Signatory** PhD(P)

DR. S. KUMAR Consultant Pathologist

CYTOGENETICS REPORT

Disclaimer: Although the methodology used in this analysis and interpretation is highly accurate, it does not detect small rearrangements and very low-level mosaicism, which are detectable only by molecular methods. Failure to detect an alteration at any locus does not exclude the diagnosis of any of the disorders. LABASSURE can assist the physician in determining the appropriate test in the context of clinical indications.
