

KOS Diagnostic Lab (A Unit of KOS Healthcare)

Dr. Vinay Chopra MD (Pathology & Microbiology) Chairman & Consultant Pathologist

Dr. Yugam Chopra MD (Pathology) CEO & Consultant Pathologist

NAME: Ms. NARINDER KAUR (5615)

Age/Gender: 22 Y/Female Lab NO: 012409260001 Referred BY: Self Remark:

Accession No.: Specimen ID: Specimen: Whole Blood HEPARIN Collected: 26/Sep/2024 07:53AM Registered: 26/Sep/2024 07:53AM 10/Oct/2024 05:09PM Reported:

CYTOGENETICS REPORT

Test Name: Karyotype - Blood

RESULT:

Method: G-banding Metaphases counted: 20 Metaphases analyzed: 20 Metaphases karyotyped: 14 400 Banding Resolution: Karyotype (ISCN 2016): 46,XX

INTERPRETATION:

Normal female chromosome complement. There is no evidence of aneuploidy or structural rearrangement at the resolution of banding analysis

Mr. Brijesh Authorised Signatory PhD(P)

DR. S. KUMAR MBBS, MD Consultant Pathologist

Disclaimer: Although the methodology used in this analysis and interpretation is highly accurate, it does not detect small rearrangements and very low-level mosaicism, which are detectable only by molecular methods. Failure to detect an alteration at any locus does not exclude the diagnosis of any of the disorders. LABASSURE can assist the physician in determining the appropriate test in the context of clinical indications.
