For MRS.ANU , born on 20-02-1988, a screening test was performed on the 30-01-2018. Prisca screens for Trisomy 21, Trisomy 18 and Neural tube defects (NTD).

TRISOMY 21 SCREENING
The calculated risk for Trisomy 21 is below the cut off which represents a low risk.
 After the result of the Trisomy 21 test it is expected that among 4074 women with the same data, there is one woman with a trisomy 21 pregnancy and 4073 women with not affected pregnancies.
 The calculated risk by PRISCA depends on the accuracy of the information provided by the referring physician.
