Risks at sampling date Age risk at sampling date Overall population risk 1:600 T Risk 1:10 1:100 1:1000 1:10000	Frisomy 21 Frisomy 13/18 Frisomy 21 Frisomy 31 Frisomy 336 women and woman with a triso	sk for Trisomy 21 i ents a low risk. the Trisomy 21 test	1:336 1:9429 s below the cut
Age risk at sampling date Overall population risk 1:600 T Risk 1:10 1:000 1:10000	Trisomy 13/18 Trisomy 21 The calculated risoff which represe After the result of to among 336 women woman with a triso	ents a low risk. the Trisomy 21 test	1:9429 s below the cut
Overall population risk 1:600 T Risk 1:10 1:00 1:100 1:1000	Trisomy 13/18 Trisomy 21 The calculated risoff which represe After the result of to among 336 women woman with a triso	ents a low risk. the Trisomy 21 test	1:9429 s below the cut
Risk 1:10 1:00 1:000 1:10000	risomy 21 The calculated risoff which represe After the result of to among 336 women woman with a triso	ents a low risk. the Trisomy 21 test	s below the cut
1:10 1:00 1:00 1:1000 1:10000	The calculated ris off which represe After the result of t among 336 women woman with a triso	ents a low risk. the Trisomy 21 test	
1:10 1:700 1:1000 1:10000	off which represe After the result of t among 336 womer woman with a triso	ents a low risk. the Trisomy 21 test	
Trisomy 13/18 The calculated risk for Trisomy 13/18 is 1:9429, which indicates a low risk.	among 336 women with the same data, there is one woman with a trisomy 21 pregnancy and 335 women with not affected pregnancies. The calculated risk by PRISCA depends on the accuracy of the information provided by the referring physician. Please note that risk calculations are statistical approaches and have no diagnostic value!
