<p>The graph plots risk (1:10000 to 1:10) against age (13 to 49). A vertical line at age 25.1 indicates the patient's age. A diagonal line represents the 'Cutoff'. The area below the cutoff is green, the area between the cutoff and the age risk line is yellow, and the area above the cutoff is red.</p>		<p><b>The calculated risk for Trisomy 21 is below the cut off which represents a low risk.</b></p> <p>After the result of the Trisomy 21 test it is expected that among 706 women with the same data, there is one woman with a trisomy 21 pregnancy and 705 women with not affected pregnancies.</p> <p>The calculated risk by PRISCA depends on the accuracy of the information provided by the referring physician. Please note that risk calculations are statistical approaches and have no diagnostic value!</p>
