Risk		Trisomy 21		
<p>The graph plots risk (1:1000 to 1:10) against age (13 to 49). A diagonal line labeled 'Cutoff' separates the 'below cut off' (green) area from the 'above cut off' (red) area. A yellow area is also present between the green area and the cutoff line.</p>		<p>The calculated risk for Trisomy 21 is below the cut off which represents a low risk.</p> <p>After the result of the Trisomy 21 test it is expected that among 2260 women with the same data, there is one woman with a trisomy 21 pregnancy and 2259 women with not affected pregnancies.</p> <p>The calculated risk by PRISCA depends on the accuracy of the information provided by the referring physician. Please note that risk calculations are statistical approaches and have no diagnostic value!</p>
