<p>The graph plots risk (1:10000 to 1:10) against age (13 to 49). A diagonal line labeled 'Cutoff' separates the risk levels. The area below the cutoff is divided into three zones: green (bottom), yellow (middle), and red (top).</p>		<p>The calculated risk for Trisomy 21 is below the cut off which represents a low risk.</p> <p>After the result of the Trisomy 21 test it is expected that among 3395 women with the same data, there is one woman with a trisomy 21 pregnancy and 3394 women with not affected pregnancies.</p> <p>The calculated risk by PRISCA depends on the accuracy of the information provided by the referring physician. Please note that risk calculations are statistical approaches and have no diagnostic value!</p>
