

Date of report: 23-03-2019  
Prisca 5.0.2.37

| Patient data   |                   | Ultrasound data  |                                 |           |
|--|-------------------|--|---------------------------------|-----------|
| Name   | MRS. MANJEET KAUR | Gestational age at sample date   | 13 + 3                          |           |
| Birthday   | 01-01-1993        | Method   | Scan                            |           |
| Age at sample date   | 26.0              | Scan date  | 21-03-2019                      |           |
| Patient ID   | 211903220001      |  |                                 |           |
| Correction factors   |                   |  |                                 |           |
| Fetuses  | 1 IVF             | no   | Previous trisomy 21 pregnancies | no        |
| Weight in kg   | 46 diabetes       | no   |                                 |           |
| Smoker   | no Origin         | Asian  |                                 |           |
| Pregnancy data   |                   | Parameter  | Value                           | Corr. MoM |
| Sample Date  | 22-03-2019        | PAPP-A   | 2.72mIU/ml                      | 0.40      |
|  |                   | fb-hCG   | 35.5 ng/ml                      | 1.10      |
| Risks at sampling date   |                   |  |                                 |           |
| Age risk at sampling date  | 1:1075            | Trisomy 21   | 1:547                           |           |
| Overall population risk  | 1:600             | Trisomy 13/18  | 1:4158                          |           |
| Risk   |                   | Trisomy 21   |                                 |           |
|  |                   | <p><b>The calculated risk for Trisomy 21 is below the cut off which represents a low risk.</b></p> <p>After the result of the Trisomy 21 test it is expected that among 547 women with the same data, there is one woman with a trisomy 21 pregnancy and 546 women with not affected pregnancies.</p> <p>The PAPP-A level is low.</p> <p>The calculated risk by PRISCA depends on the accuracy of the information provided by the referring physician. Please note that risk calculations are statistical approaches and have no diagnostic value!</p> |                                 |           |
| Trisomy 13/18  |                   |  |                                 |           |
| <p><b>The calculated risk for Trisomy 13/18 is 1:4158, which indicates a low risk.</b></p> |                   |  |                                 |           |
