Trisomy 21		Trisomy 21 <1:10000	
,		<1:10000	
After the result of the Trisomy 21 test it is expected that among more than 10000 women with the same data, there is one woman with a trisomy 21 pregnancy. The calculated risk by PRISCA depends on the accuracy of the information provided by the referring physician. Please note that risk calculations are statistical approaches and have no diagnostic value! Age atted risk for trisomy 13/18 is < 1:10000,
