Name:	Mr. HARDEEP SINGH	Accession No.:	930367
Age/Gender:	29 Yrs/Male	Specimen ID:	BC20000556
Lab No:	012011230174	Specimen:	Whole Blood HEPARIN
Referred By:	M/S KOS Diagnostic Lab	Registered:	23/Nov/2020 02:45PM
Remark:		Reported:	08/Dec/2020 05:12PM

CYTOGENETICS REPORT

Test Name:Karyotype - Blood

RESULT:

Method:	G-banding
Metaphases counted:	20
Metaphases analyzed:	20
Metaphases karyotyped:	20
Banding Resolution:	450
Karyotype (ISCN 2016):	46, XY
Result:	Normal

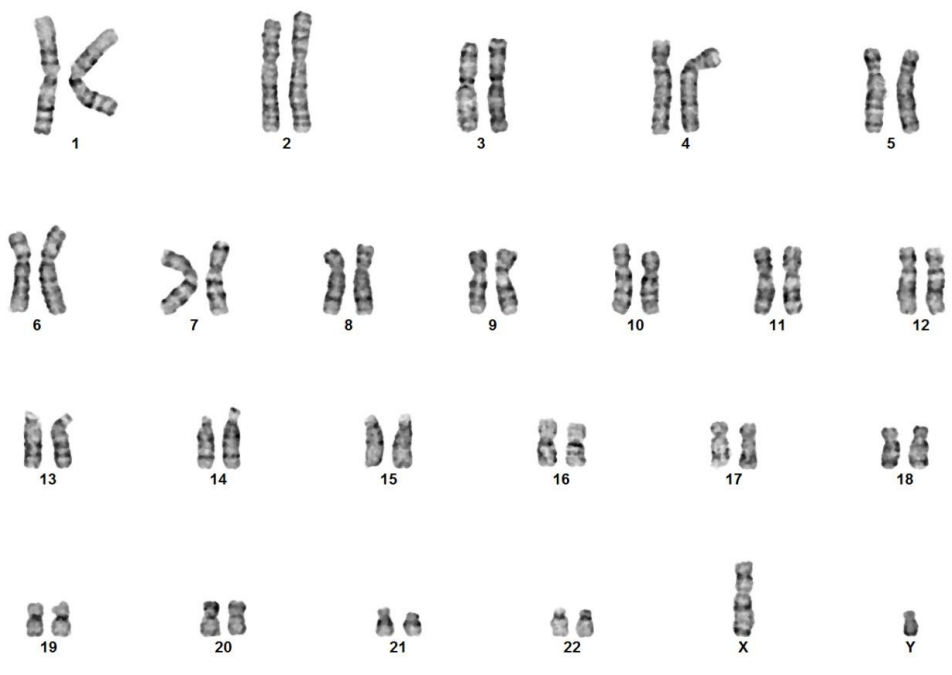

INTERPRETATION:

Normal male chromosome complement. There is no evidence of aneuploidy or structural rearrangement at the resolution of banding analysis.

Name:	Mr. HARDEEP SINGH	Accession No.:	930367
Age/Gender:	29 Yrs/Male	Specimen ID:	BC20000556
Lab No:	012011230174	Specimen:	Whole Blood HEPARIN
Referred By:	M/S KOS Diagnostic Lab	Registered:	23/Nov/2020 02:45PM
Remark:		Reported:	08/Dec/2020 05:12PM

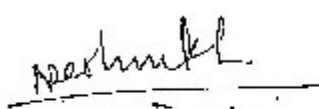

KARYOTYPE:

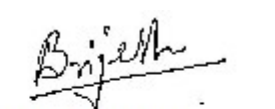

Disclaimer: Although the methodology used in this analysis and interpretation is highly accurate, it does not detect small rearrangements and very low-level mosaicism, which are detectable only by molecular methods. Failure to detect an alteration at any locus does not exclude the diagnosis of any of the disorders. LABASSURE can assist the physician in determining the appropriate test in the context of clinical indications.
