### Chromosome Analysis Report

**Clinical History** : --

|                              |                                   |
|------------------------------|-----------------------------------|
| <b>Culture type</b>          | : 72 hours PHA stimulated culture |
| <b>Banding Method</b>        | : GTG                             |
| <b>Banding Resolution</b>    | : Inadequate                      |
| <b>Metaphases Counted</b>    | : 00                              |
| <b>Metaphases Analyzed</b>   | : 00                              |
| <b>Metaphases Karyotyped</b> | : 00                              |
| <b>Quality of Metaphase</b>  | : Inadequate                      |

**Note** : **Inadequate metaphases were obtained even after repeating the process two times, please provide fresh repeat sample, for analyzing additional metaphases.**

# For specimens received from non NCGM locations, it is presumed that it belongs to the patient as identified on the labels of the container/Test Requisition Form and it has been verified as per GCLP (Good Clinical Lab Practices) by the referrer at the time of collection of the specimen. NCGM's responsibility is limited to the analytical part of the assay performed.
